04-01-2022 · This work addresses the anatomy of a 2D polymer formation; that is, we identify, localize, and describe the various processes required to obtain such a macromolecule in a single-crystal-to-single-crystal reaction. It contains aspects of lattice, local and integral strain, and the distribution of strain in the crystal and assembles the various bits and pieces to a full-scale …

**What is mesh and node analysis - Student Circuit**

09-01-2018 · This post answers the question “What is mesh and node analysis”. This two techniques are both used as basic analysis methods for circuits. When designing a complex electrical device there are a lot of factors that occur, like current leaks, heat flow, electromagnetic fields, behaviour of electrical materials etc.
